Appl. No.: 10/789,250
Office Action dated: 06/11/2008

Amendments to the Specification:

Please add the following new paragraph after paragraph [0051]:

[0051.1] A portion of the DAL 24, including the memory 28, forms a program storage device readable by a machine, tangibly embodying a program of instructions executable by the machine for performing operations to select a download technology for downloading information to a remote device, the operations comprising:

receiving data from the remote device by a communications operator for determining a download technology capability of the remote device by the communications operator; and

automatically selecting a download technology from a plurality of download technologies by the communications operator to download information to the remote device based upon the download technology capability of the remote device.
